

## DCOR LLC under way at Smackover program in Escambia County, Alabama

By Gosmano, Jeff

DCOR LLC is drilling a second Smackover wildcat in Alabama's Escambia County.

Energy Drilling Co's Rig #12 spud the 1 Cedar Creek Land & Timber "14-10" (API 01-053-20659) on February 22 from a site in the se nw se of section 14-3n-12e. Proposed total depth is 12,800 ft.

Two miles to the east-northeast is DCOR's 1 Cedar Creek Land & Timber "18-4" (API 01-053-20660) in section 18-3n-13e. That wildcat was drilled in February to a total depth of 12,369 ft in the Smackover, with 5 1/2-inch casing set on bottom.

DCOR's Alabama wildcats are the company's first exploratory tests outside of California.

DCOR's Smackover exploratory tests are two and one-half miles south of numerous Smackover oil wells in the rapidly expanding Brooklyn and Little Cedar Creek fields. Several Smackover wells have tested at rates of up to 400 bbls of crude per day. Wells in Brooklyn field straddle the Escambia/Conecuh county line, while Little Cedar Creek field is expanding to the northeast in Conecuh County. Pruet Production and Sklar Exploration have been the most active companies in the two Alabama fields.

Seven miles southeast of DCOR's drillsite is a Smackover oil find made last year by Fairways Exploration & Production. The 1 Cedar Creek Land & Timber "17-14" in section 17-2n-12e was tested flowing 333 bbls of 35-degree crude, with 130,000 cu ft of gas and 15 bbls of water daily. Fairways' discovery, which reached a total depth of 13,466 ft, was tested through perforations at 12,980-13,020 ft. Through July 2013, recovery from the lone well in Clear Creek field totals 59,233 bbls of crude, 40.3 million cu ft of gas and 17,284 bbls of water.

To the south is Fairways' 1 Nalty "10-14" in section 10-1n-12e. It was abandoned earlier this year at a total depth of 14,520 ft.
