

# Smackover Discovery Completed By Sklar In Conecuh County

**Sklar Exploration Co., LLC, Shreveport, has tested good rate of flow at a Smackover oil discovery in the Melrose area of southern Alabama's Conecuh County.**

The No. 1 Craft-Soterra 27-6, SE NW Section 27-5N-13E, was completed flowing 577 barrels 48-gravity oil and 312,000 cubic feet of gas per day through a 22/64-inch choke with flowing tubing pressure 925 pounds. Gas-oil ratio was 541 to one. No formation water was reported.

Production is from perforations 10,597-616 and 10,619-626 feet in Smackover.

The discovery was drilled to 10,710 feet. Shows were logged in Smackover and string of 5 1/2-inch

casing was run to 10,710 feet for completion.

Rapad Drilling & Well Service, Inc., Jackson, Miss., handled contract for drilling.

Site of the discovery is one and three-quarter miles north-northwest of Melrose and one and one-half miles southwest of a recent Smackover discovery. Drill-site is also one and three-quarter miles north-northeast of Smackover oil production in Little Cedar Creek Field.

One and one-half miles northeast of the discovery, Midroc Operating Co. completed the No. 23-3 Cedar Creek Land & Timber, NE NW Section 23-5N-13E.

A Smackover completion, the discovery flowed 468 barrels 43-gravity oil and 418,000 cubic feet of gas per day through a 12/64-inch choke with flowing tubing pressure 1400 pounds. Gas-oil ratio was 893 to one. Two barrels of water were also reported.

Completion was from perforations in Smackover in a 28-foot section at 10,242-270 feet.

Drilled to a depth of 10,600 feet, string of 5 1/2-inch casing was run to 10,579 feet for completion.
