

Sklar Prepares To Sidetrack Little Cedar Ck. Area Test

Sklar Exploration Co., LLC, Shreveport, La., has drilled to 11,236 feet and is preparing to sidetrack a Smackover wildcat in the Little Cedar Creek Field area of southern Alabama's Conecuh County.

Current test is the company's No. 1 Craft-Ralls 4-2, NW NE Section 4-4N-13E.

Cores are reported to have been cut in the well but no details are available on recovery. Plugged back depth is not yet available.

Location is one-half mile northwest of the nearest completed well at Little Cedar Creek Field and three-eighths of a mile southeast of a well which has been cased for testing.

Rapad Drilling & Well Service, Inc., Jackson, Miss., handled contract.

One-half mile southwest of the current well, Sklar Exploration recently completed No. 1 Craft-Ralls 4-5, SW NW Section 4-4N-13E. A Smackover completion, the well flowed 453 barrels 47-gravity oil, 492,000 cubic feet of gas and 12 bar-

rels water per day through a 22/64-inch choke with flowing tubing pressure 150 pounds.

Completion was from pay in Smackover through perforations 10,962-988 feet. Total depth is 11,140 feet and 5 1/2-inch casing was run to 11,140 feet for completion.

Three-eighths of a mile northwest of the indicated producer, Sklar has run production casing at No. 1 Craft-Ralls 33-14, SE SW Section 33-5N-13E. This well was drilled in original hole to 11,076 feet. Shows were present in Smackover but hole was plugged back to 7025 feet and sidetracked to the west.

Total depth in sidetrack was 11,302 feet. Hole was again sidetracked. Total depth in second sidetrack is 11,100 feet. String of 5 1/2-inch casing was run to total depth and operator is waiting on completion rig to test.
